

## **Cross Trade to bring weekend trading to the (UK)**

Cross Trade Objective (Enable Investors)

## **Welcome to the Cross Trade!**

We are excited to introduce the Cross Trade platform, which will bring a major change to the industry. The Cross Trade platform allows trading between investors when the markets are closed on weekends and holidays.

### **Question:**

**Would an investor like an opportunity to trade with another investor? And have a chance to fill their order without paying the extra fees to the market makers and exchanges? Would that investor at least like to know about this?**

**Cross Trade has built a trading platform based on the concept, that investors would like to see an order book shared with other online investors and have the ability to trade with them, directly and promptly.**

Cross Trade will start with the FTSE 100.

Companies not listed within the FTSE can register their company here so they can make it's shares available to it's investor base.
